

THURSDAY 2nd OCTOBER 2025

RENCONTRES
IG2IENNES
2025

IG2I • 13 Rue Jean Souvraz • 62300 Lens

PARTNERS OF THE MEETINGS

VIVERIS

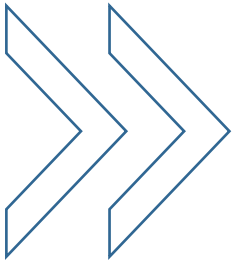

Capgemini

Atos

THEY TRUST US

LET'S MEET!

Dear professionals,

Investing in Centrale Lille's IG2I program means expanding your company's reputation among future engineers who are driving the industrial and digital transformation. The «Rencontres IG2Iennes» are a great opportunity for you to come and meet our students around topics that interest them and concern you.

The morning is dedicated to Round Tables and conferences about innovative issues of your choice, from purely technical issues to more general topics such as project management, engineering jobs, innovation in companies, and entrepreneurship.

For several years now, we have been taking this meeting even further by organizing «Jobs Dating». The concept is simple: short 10-minute interviews with students who introduce themselves with their CVs to your table.

The goal of this day is to create links between professionals and students while looking for future collaborations such as internships, apprenticeships, projects or work contracts.

We look forward to seeing many of you at this 20th edition of the «Rencontres IG2Iennes» and hope that you are just as eager to meet our students as we are to welcome you to the IG2I.

The organising team.

ROUND TABLES

The Round Tables are an opportunity to discuss with companies, student-engineers and professors on themes related to:

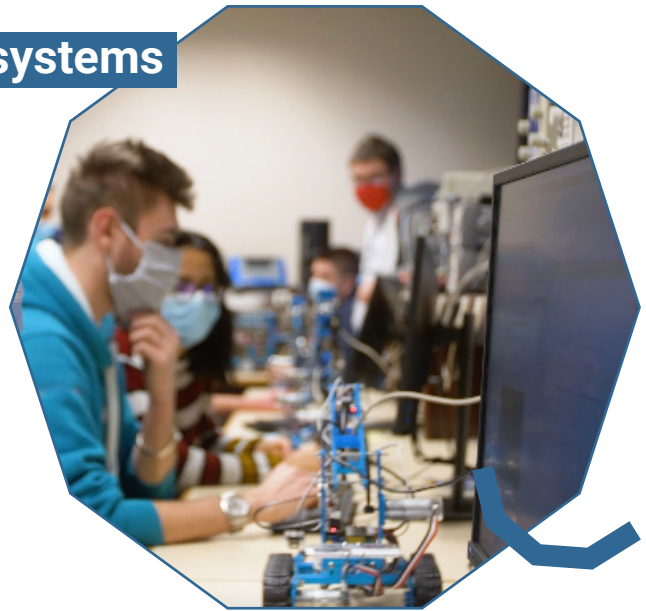

Cloud & Software

- Cybersecurity
- Machine Learning and Big Data
- Green Computing
- IT in finance
- Cloud Computing

Smart systems

- Industry 4.0
- Robotic
- IOT
- Supply Chain
- Safety at work
- Maintenance
- Embedded Systems

Other topics

- Entrepreneurship
- Project management
- Health
- Career management

CONFERENCES & JOB DATING

Conferences

It is also possible to give a conference of 1 to 2 hours on your company in parallel with the Round Tables in the morning, depending on the chosen formula. Please feel free to choose the topics you want to discuss about, but we ask you to inform us in advance. You can also bring debates related to these topics and you would be the only moderator.

Job dating

During Jobs Dating, five-year students or students who are looking for an apprenticeship will meet you for interviews. You are free to choose beforehand the maximum number of students you would like to interview during slots of 15 minutes maximum. It is also possible, depending on the number of stakeholders in your company, to distribute the students among yourselves.

Feel free to contact them back, so that the students can position themselves on your various offers.

Program for Thursday 2nd October 2025

9.00 am Opening Speech

10.00 am Round Tables and Conferences

12.00 pm Buffet

1.20 pm First stage of Job Dating

3.00 pm Break and "trailer" movie of the gala dinner

3.30 pm Second stage of Job Dating

5.30 pm Closing

6.00 pm Afterwork

PACKAGES

Registration

You can choose between **3 formulas** with options depending on the type of intervention you would like to select.

Representatives

From **1 to 6 representatives** of your company willing to participate in the Rencontres IG2Iennes.

Job dating

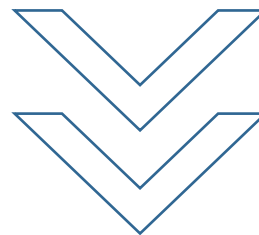

You can **choose the maximum number** of students you would like to interview.

Conferences

You can give a conference instead of a round table or **do both in parallel** depending on your representatives and the formula chosen.

Fees from €1,200 to €5,000
<http://rencontresig2iennes.fr>

Sponsoring

- **Opening speech** on the D-day
- **Logo** highlighted
- **Priority** on fifth-year students
- **2 seats** to the gala dinner in November
- **Space for presentation** provided during the buffet

Event book

The Event book **will be distributed** before the event to all students and teachers.

This is a **directory of companies** that are present on D-Day, classified by areas of activity, where you can present your different offers (internships, work-study programs, etc.).

Logo

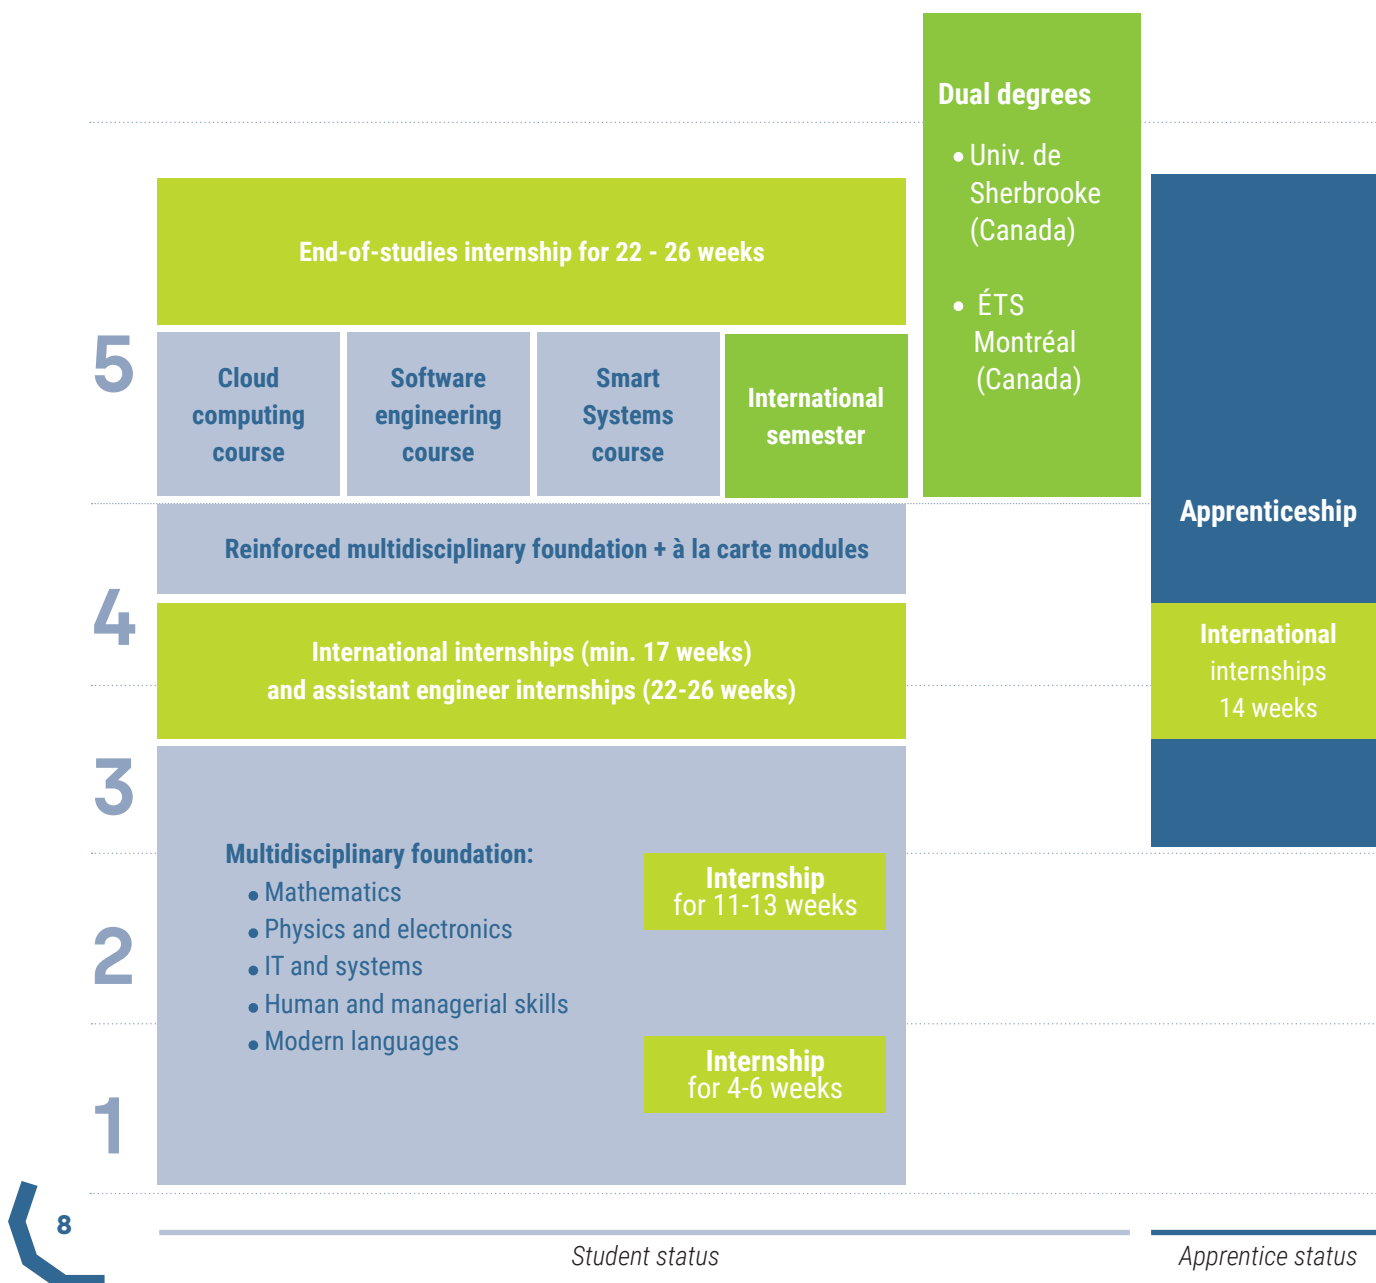

You can **add your logo** on the communication supports in IG2I for one year.

Video

You can **display a video presentation** of your company during the Rencontres IG2Iennes.

Dual expertise in software and hardware

The aim of IG2I is to train digital engineers in designing and integrating innovative and responsible digital components and solutions in order to produce autonomous, embedded systems that can be integrated into complex systems combining software and hardware aspects.

GRADUATION CEREMONY & GALA DINNER

Opening speech at graduation ceremony

Michel Hecquet, Director of IG2I,
at Mercure Hôtel Lille Airport
in Lesquin - Novembre 2022.

The Gala dinner is one of the most important events of IG2I. On this prestigious night the outgoing class graduation takes place.

On this night, graduates' families, students of IG2I, members of the Centraliens de Lille, teachers and members of the school administration, representatives of partner companies as well as a lot of other guests will be present.

Beginning with the graduation ceremony, the evening is followed by a dinner, accompanied by a variety of entertainment and shows. A movie, made by the students, will be diffused during the gala. We will be airing the trailer during the Rencontres IG2Iennes.

For the most prestigious event in the schooling of an IG2I student, the company that sponsors the event will be given the opportunity to make a speech at the time of the graduation and will be our special guest this night.

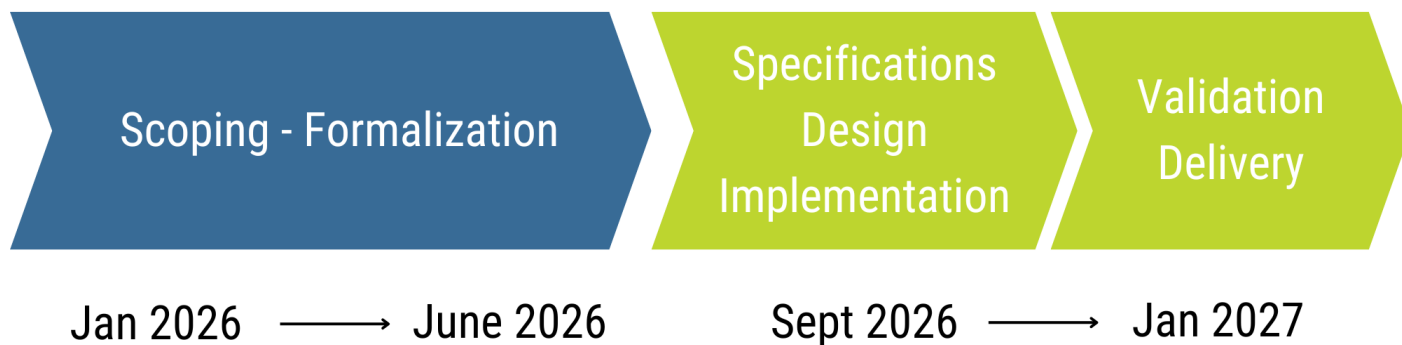

FINAL-YEAR PROJECTS

A collaboration between your company and our engineering students

The Final-Year Project is a unique opportunity for your company to collaborate with last-year students from Centrale Lille Institute. Conducted under a project agreement (and not a commercial service), this initiative allows you to benefit from the expertise of a leading engineering school and the commitment of motivated students to address your specific challenges.

Project Timeline

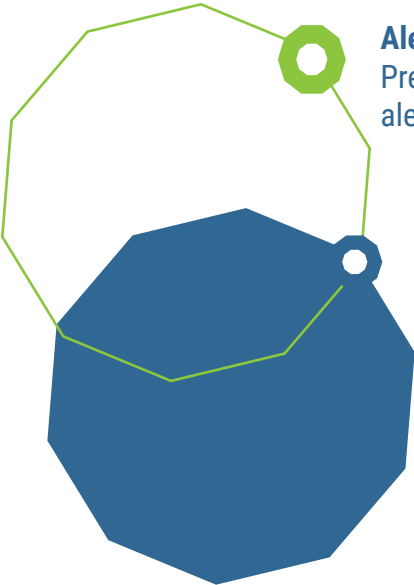

Project Value : €20,000

The project, valued at €20,000, covers 1,150 hours of work (230 hours per student) dedicated to the phases of specification, design, implementation, validation, and delivery (from September 2026 to January 2027). This is an educational partnership supervised by Centrale Lille Institute, providing academic and technical guidance, access to the necessary infrastructure, and a rigorous methodology ensuring the quality of deliverables.

This is not a conventional service contract but a project agreement that simultaneously ensures both the training of students and concrete solutions for your company. Thus, you benefit from an in-depth study of your problem, innovative solutions, collaboration with talented engineers, and structured follow-up carried out with seriousness and professionalism.
